# Growth of Cannabis

## Whats happening?

An increasing number of Cannabis “Factories” are being uncovered within the Borough of Broxtowe. Cannabis Factories are often in suburban houses rented for the purpose of setting up a factory. The interiors are stripped out and plants are grown under hothouse conditions often crammed into every room of the property. Many of these factories are detected after suspicions are raised by members of the local community.

## What to look for

The following suspicious circumstances may indicate that a Cannabis Factory has been set up:

- Windows of the property permanently covered from the inside
- A smell of Cannabis
- Unusually bright lights that may be continual throughout the night
- Large amounts of plant pots, spent compost and empty plant food containers discarded outside the premises
- There may be a vent protruding from the roof or a rear window
- People often do not live in the premises and only visit to maintain the “grow”
