

Second Exercise – General Suggestion of SMART Targets for outcomes – What difference do we want to make?

Idea 1	Idea 2
PT –Box fit – youth offending programmes. Improving people’s perceptions around diet and mental health.	Cycle paths – accessibility with people with disabilities
Dementia friendly community’s recognition.	Connection to wider area – easier to get to Long-Eaton rather than wider Broxtowe. Increased accessibility
Gaps that have been identified; Mental health support – local community based level – direct support (peer to peer). Access to groups and activities	Middle street used as an example as a community hub base
Creation of space to support existing programmes – everyone health. General health management for every stage of life – foundations.	Link with schools and employers
Sports development team – events etc. active Notts – local data – flipped on it’s head. Identifying niche groups speaking to them – how can we get you more active? Golden thread – mental health improving (and physical health). Haven Centre. Community champions – sports development teams connected with schools – going in to the community. Link up with any community facilities.	Physical Hub – range of services – vocational and other learning – STEM (complementary to NUASt). Intelligence on young people accessing NUASt. Community/cultural other public services
Changing places – disability friendly centre.	
Connecting to wider housing developments. Easy choice to make Stapleford the place to go for everything you need.
