Context analysis	
Urban Regeneration, Planning and Land Use	
Skills and Enterprise Infrastructure	CT Skills working with Stapleford Community Centre – CSCS cards (55 people). Direct people to this service. Young people want to stay in Stapleford for their training. Physical Facility to provide this service – need internet. Splitting figures down in to demographics – age. UC credit – DWP stat explore system for young people data – figures released this week – young people affected more. Kick Start programme. Check central government programme – link with Beeston Job Centre. Speak to Tim outside the meeting.
Physical Connectivity	
Digital Connectivity

Town Vision	
Headline Outcomes	
Targets for 2030 and Beyond	
Summary of Projects	Facility requirements for the library to be sent over by Peter Crib. Current facility has similar services to what is being proposed in central hub. Look at complementary offer to library – additional learning space? Stapleford Young People’s centre – currently got a really good centre – want a better one – outside space for different sports and games. Really keen – centre of Stapleford – not too keen on Ilkeston Road. New purpose built – that is their own – good at sharing their facility but would ultimately need to be in control of it. Owned/Controlled by county council service. Hickings Lane park? Fire Station site? GM to ask fire station about plans – Muggers? Fire service to stay where they are. Logistics – Investigate further – GM to send costs rough over. Aurther Mee centre – long-term are they looking to move out? RO to investigate further.
Strategic Plan	Objectives/Targets – speak with Paul Hiller about cycle networks.

	<p>Health Facilities in to the Community Hub? Outreach offer? Existing space is REALLY expensive? Larger rooms for group rehab sessions – client meetings. Existing services struggle for space without spending the earth.</p> <p>Referral systems in to other services. Health service opposite library works well. Speak with Elaine about space required and how that would work.</p>
